📍 Chennai

👤 OBJECTIVE

Results-driven **Software Developer** with 3+ years of experience designing and building responsive, user-centric web applications using **React.js, Tailwind CSS, and Material-UI**. Proficient in developing reusable UI components, state-driven workflows, dashboards, and performance-optimized interfaces. Worked as a **Full-Stack Developer on the ZEN CRM platform**, implementing features using **Node.js, Express, and MySQL**, while contributing primarily as a **Frontend Developer** across other projects. Experienced in **JWT-based authentication, RBAC, REST API integrations, and modern UI/UX best practices**. A reliable team collaborator with hands-on experience in **Agile environments and CI/CD pipelines**, committed to delivering scalable and maintainable software solutions.

👜 EMPLOYMENT

Software Developer, Urbancode Edutech Pvt Ltd - 05/2022 - present

🎓 EDUCATION

B.Tech - Electronics & Communication Engineering
with CGPA 8.3.

2019 – 2023

🧠 SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, React Router, Redux Toolkit, React Query, Material-UI, Styled Components, Tailwind CSS, React Hook Form, Yup
- **Backend:** Node.js, Express.js, REST APIs, Authentication & Authorization (JWT), Middleware Design, Error Handling, Microservices Integration
- **Database:** MongoDB, Mongoose, Schema Design, Indexing, Aggregation Pipelines, Query Optimization, PostgreSQL, SQL
- **DevOps & Tools:** Git, GitHub, Bitbucket, VS Code, Postman, GitHub Actions, Jira, ClickUp, Figma
- **AI Tools:** GitHub Copilot, ChatGPT, OpenAI APIs, Prompt Engineering, AI-driven Code Review & Debugging

📁 PROJECTS HANDLED

Project 3: Kattraan Learning Management System (LMS) — In Progress (March 2024 – Present)

Tech: React.js, TypeScript, Tailwind CSS / Material-UI, React Router, Redux Toolkit, Axios, Firebase

Overview: A Learning Management System designed to improve digital learning through course delivery, student progress tracking, instructor tools, and interactive dashboards.

Key Responsibilities :

- Developing **responsive, student-friendly LMS interfaces** using React.js and modern UI frameworks.

- Building **course listing, enrollment, and progress tracking modules** with reusable React components.
- Managing application state with **Redux Toolkit**, handling user sessions, roles, and interactions smoothly.
- Integrating the UI with **backend REST APIs** for real-time course, user, and assignment data.
- Using **Firestore (where applicable)** for authentication, hosting, and notification workflows.
- Working closely with designers and backend teams to refine UX, ensure consistency, and improve usability.

Project 2: ZEN CRM – Training & Operations Management

Tech: React.js, Node.js, Express.js, MySQL, Tailwind CSS, Material-UI, Axios, JWT, Canva

Overview: A centralized CRM platform used to manage courses, trainers, batches, students, payments, and operations, with role-based access, automated email workflows, and real-time analytics.

Roles & Responsibilities:

- Developed **responsive, reusable UI components** using React.js, Tailwind CSS, and Material-UI across course, batch, trainer, and finance modules.
- Built **REST APIs** in Node.js & Express for course management, enrollments, payments, and scheduling workflows.
- Designed and optimized **MySQL database schemas** covering courses, trainers, batches, users, and financial records.
- Implemented **RBAC and JWT authentication** to secure modules and protect sensitive user data.
- Integrated **email automation workflows** (enrollment confirmations, trainer assignment, reminders, schedule updates).
- Built **dashboard analytics** for revenue trends, trainer workload, batch status, and course performance.
- Performed **API testing, UI validation, error handling, and data consistency checks** across modules.
- Worked in **Agile sprints**, refining requirements and improving UX features such as search, filters, sorting, and pagination.

Project 1: eKYC Platform

Tech: React.js, TypeScript, React Router, Redux Toolkit, React Query, Material-UI, Axios, React Hook Form, Yup, ClickUp, Bitbucket.

Overview: A modular eKYC platform enabling secure digital onboarding through document submission, identity verification, and real-time review workflows — designed with a scalable, component-driven frontend architecture.

Roles & Responsibilities :

- Built **multi-step onboarding flows** using React Router & Redux Toolkit, ensuring smooth navigation and reliable state management across steps.
- Developed **document upload interfaces** with client-side validation (file type, size, error handling) and integrated APIs for OCR-based data extraction.
- Implemented **face-verification UI** using the Media Devices API, seamlessly integrating with backend identity-matching services.
- Designed an **admin dashboard UI** using React Query for efficient data fetching, caching, and background updates.
- Enforced **schema-based form validation** using React Hook Form + Yup, significantly reducing invalid or incomplete submissions.
- Collaborated in **Agile sprints**, participated in code reviews, and followed clean Git workflows using Bitbucket and ClickUp.
